Clea Johnson
Regulatory Affairs Coordinator
LPS Laboratories
4647 Hugh Howell Rd
Tucker, GA 30084

Dear Ms. Johnson:

The U.S. Environmental Protection Agency applauds LPS Laboratories ("LPS Labs") for your leadership in developing an environmentally oriented degreaser. EPA's Design for the Environment ("DfE") program seeks to promote the use of products with improved environmental and human health characteristics. The product in our partnership – LPS T-91 – fully achieves that objective in the I/I cleaning sector.

The key purpose of the DfE– LPS Labs partnership is to recognize and encourage the environmentally preferable chemistry of the partnership product. DfE is very enthusiastic about your successful formulation of this product and about our partnership. By eliminating hazardous solvents, environmentally persistent surfactants, and other harmful ingredients, you have demonstrated active environmental stewardship and dedication to continuous improvement.

Consumers who use your recognized product will be participants in this important national effort to protect the environment and safeguard human health. We commend LPS Labs for your commitment to improving the environmental profile and performance of your product– and for leading change in the cleaning industry. DfE looks forward to building this partnership and wishes you much success with the partnership product.

Sincerely,

A handwritten signature in green ink that reads "Clive Davies".

Clive Davies, Chief
Design for the Environment

EPA/DfE recognition does not constitute endorsement of this product. The Design for the Environment logo signifies that the formula for this product, as LPS Laboratories has represented it to the EPA, contains ingredients with more positive health and environmental characteristics than conventional cleaners. EPA/DfE relies solely on LPS Laboratories, its integrity and good faith, for information on the composition, ingredients, and attributes of this product. EPA/DfE has not independently identified, i.e., via chemical analysis, the ingredients in the product formula, nor evaluated any of the non-ingredient claims of LPS Laboratories. EPA/DfE expresses its judgment and professional opinion only as to the environmental and human health characteristics of the product, based on currently available information and scientific understanding.
